

"Gamma Iota Sigma provided me the opportunity to attend the NAPSLO Excess and Surplus lines symposium hosted by Troy University in Birmingham Alabama. The symposium consisted of a career/internship fair and multiple presentations covering topics in the E & S market from experienced professionals. This conference allowed me to network with potential future employer, professors, and other students studying insurance from all over the country. I was able to gain a tremendous amount of knowledge on a unique market that is not commonly taught about in universities. The E & S market is very interesting and I do plan on pursuing a career in this area of the industry. I would have never had the opportunity to meet these people and form the friendships I did if it were not for my involvement in Gamma Iota Sigma."
